This table presents AJO's return objectives over the benchmark and the anticipated tracking error relative to the benchmark. These objectives do NOT reflect actual account returns and are NOT guaranteed returns. Actual client returns may differ materially, and clients may lose money. The return objectives represent the returns we seek to produce before fees, and they are willingly used to establish performance-based fees.

\* Standard deviation of absolute returns is expected to be lower than the broad equity market (Russell 1000 Index) but greater than the MSCI USA Minimum Volatility Index. Historically, our returns are about 20% less volatile relative to the former and about 20% more volatile relative to the latter.

## NOTES

AJO, LP, is an independent, registered investment adviser. AJO claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Prior to 1/1/03, the firm was known as ARONSON+PARTNERS; prior to 6/25/12, the firm was known as ARONSON+JOHNSON+ORTIZ. AJO has been independently verified by Ashland Partners for the period 10/1/85 through 6/30/16 and by ACA Performance Services for the period 7/1/16 through 12/31/18. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The following composites have been examined for the periods indicated:

The verification and performance examination reports are available upon request.

All composites listed are calculated in US\$, asset-weighted, and presented gross and net of investment management fees. All portfolios are fee-paying, fully discretionary accounts included from the first full month following completion of initial funding to the present or to the month prior to termination. Prior to 2011, portfolios with client-directed capital flows of 10% or greater that impacted portfolio performance in a significant and nonrepresentative manner were temporarily removed from composite return calculations. From 2011 onward, a portfolio with any size flow remains in its composite. The performance impact of flows are mitigated using a temporary new-account methodology. AJO's quantitative investment process is supported by proprietary computer code, third-party software, and ongoing data feeds from third-party data providers, and may not operate correctly in all market conditions. As with any data-driven model, errors may occur in coding, software, and/or data feeds.

Composite creation date is inception date, except AJO Large Cap – Absolute Value, created 3/31/97. The AJO Global Market-Neutral Flex composite was named the AJO Global Market-Neutral composite from inception through 5/31/16, when it was renamed and redefined to reflect a change in long/short exposure from 100/100 to 150/150 during June 2016, and that the timing and magnitude of this and possible future leverage changes are integral to the investment strategy. The AJO Small Cap composite was redefined to reflect a benchmark change from the Russell 2000/2500 to the Russell 2000, effective 1/1/18. Returns use trade-date accounting and are time-weighted total returns including cash and equivalents and reinvestment of income for portfolios that reinvest. Annual composite dispersion reflects the high-low return spread among portfolios invested for the full year. Tracking error is the annualized standard deviation of monthly value-added relative to the benchmark. When rolling-three-year standard deviation is not presented, it is because the composite does not have a three-year history.

A portfolio's gross return considers transaction costs but not investment management fees and other expenses incurred in account management. Net returns reflect the deduction of actual investment management and performance-based fees, which are recorded on an accrual basis. For example, based on our U.S. equity small-cap investment strategy, with a 27.8-year track record as of 6/30/19, investment management fees would reduce cumulative returns from 1,939.8% to 1,565.7%, or 11.5% to 10.7% on an annualized basis. For certain periods, accruals for performance-based-fee accounts may cause net returns to be under- or overstated or to exceed gross returns. AJO's fee schedule is presented below and in the firm's Form ADV.

Benchmark returns are total returns per the benchmark source. The Russell 2000 Blend benchmark represents a 50%/50% blend of the Russell 2000/2500 indices, rebalanced monthly, from 12/31/91 through 12/31/17 and the Russell 2000 Index thereafter. AJO Emerging Markets Long/Short and AJO Global Market-Neutral Flex composite performance is compared to the FTSE 3-Month T-Bill Index, an unmanaged index of short-term debt obligations guaranteed by the U.S. Government that are considerably less risky than investing in stocks.

The source for MSCI returns is MSCI. The MSCI Emerging Markets, World, and All-World indices listed are net total return indices that reinvest dividends after the deduction of withholding taxes, using a tax rate applicable to nonresident institutional investors who do not benefit from double-taxation treaties. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This presentation is not approved, reviewed, or produced by MSCI. Composite and benchmark returns of our emerging markets strategies are presented net of withholding tax. A significant portion of emerging markets and global levered market-neutral assets may be invested in single-stock equity swaps. A swap agreement is a derivative. Entering into an equity swap may involve a degree of leverage since some equity swaps may not be fully funded. Long/short, market-neutral, and short-enabled composites involve a degree of "leverage": borrowed stocks are sold short; short sale proceeds and long stocks become collateral. For example, a \$100mm long/short account may have \$97mm exposure to long stocks, \$77mm exposure to short stocks, and \$80mm cash (\$30mm short sale proceeds + \$47mm swap collateral + \$3mm cash buffer), totaling \$254mm "in play." Long/short and short-enabled investing can be riskier than long-only investing since both the long and short sides can simultaneously lose value.

AJO has firm assets invested in the AJO Emerging Markets Long/Short composite, the AJO Emerging Markets Large Cap composite, the AJO Emerging Markets All Cap composite, and the AJO Global Market-Neutral Flex composite, and one or more AJO employees have personal assets invested in the AJO Emerging Markets Small Cap composite.

## COMPOSITE DESCRIPTION — U.S.

Composites include all institutional portfolios invested in U.S.-listed equities using a quantitative process that focuses on low-priced companies with effective management and positive momentum, and favorable sentiment while considering risk and transaction costs. Composites are defined by the benchmark they stalk (except in the case of AJO Managed Volatility where the benchmark listed is for performance comparison only), as well as their investment universe and risk constraints.

Name	Benchmark Name	Investment Universe	Risk	Gross Prospective	
				Added Value	Tracking Error
AJO Top Cap	Russell Top 200 Index	Top cap	Baseline	1%	3%
AJO Large Cap	S&P 500 Index	Large cap	Baseline	2%	4%
AJO Large Cap – Absolute Value 500	S&P 500 Value Index	Large cap	Baseline	2%	4%
AJO Large Cap 1000	Russell 1000 Index	Large cap	Baseline	2%	4%
AJO Large Cap – Absolute Value	Russell 1000 Value Index	Large cap	Baseline	2%	4%
AJO Mid Cap	Russell Midcap Index	Mid cap	Baseline	2-3%	4-5%
AJO Small Cap	Russell 2000 Blend	Small cap	Baseline	3-4%	4-6%
AJO Small Cap – Absolute Value	Russell 2500 Value Index	Small cap	Baseline	3-4%	4-6%
AJO Top Cap – Absolute Value 130/30	Russell Top 200 Value Index	Top cap	Short-enabled	<2%	>4%
AJO Large Cap – Absolute Value 130/30	Russell 1000 Value Index	Large cap	Short-enabled	>3%	<6%
AJO Managed Volatility	Russell 1000 Index or MSCI USA Minimum Volatility Index	Large cap	Reduced volatility	2%	5-6%

Gross prospective added value illustrates AJO's annual return objectives over the benchmark and the anticipated tracking error relative to the benchmark. They do not reflect actual account returns and are NOT guaranteed returns. Actual client returns may differ materially, and clients may lose money. The return objectives represent the returns we seek to produce before fees, and they are willingly used to establish performance-based fees.

## COMPOSITE DESCRIPTION — EMERGING MARKETS

Composites include all institutional portfolios that use a quantitative process that focuses on low-priced companies with effective management, positive momentum, and favorable sentiment while considering risk and transaction costs. Composites are defined by the benchmark they stalk (except in the case of AJO Emerging Markets Long/Short, where the benchmark listed is for performance comparison only), investment universe, region, and risk constraints. Portfolios in all three composites invest in emerging and frontier markets, and portfolios in AJO Emerging Markets Long/Short also invest in non-U.S. developed markets.

Name	Benchmark Name	Investment Universe	Risk	Gross Prospective	
				Added Value	Tracking Error
AJO Emerging Markets All Cap	MSCI Emerging Markets IM Index	All cap	Baseline	3%	5%
AJO Emerging Markets Small Cap	MSCI Emerging Markets Small Cap Index	Small cap	Baseline	4%	6%
AJO Emerging Markets Long/Short	FTSE 3-Month T-Bill Index	All cap	Long/short	8%	8%

Gross prospective added value illustrates AJO's annual return objectives over the benchmark and the anticipated tracking error relative to the benchmark. They do not reflect actual account returns and are NOT guaranteed returns. Actual client returns may differ materially, and clients may lose money. The return objectives represent the returns we seek to produce before fees, and they are willingly used to establish performance-based fees.
